Periodic Table of Elements
1869, by Dmitri Mendeleev
(RUSSIAN BIGAMIST)

SOME SCIENTISTS THINK HELIUM SHOULD GO HERE.

SOME SCIENTISTS THINK HYDROGEN SHOULD GO HERE.

1902: THEY ADDED A WHOLE COLUMN.

1914: THEY REORGANIZED THE TABLE BY ATOMIC NUMBER INSTEAD OF ATOMIC WEIGHT.

1940: THEY ADDED TWO ROWS.

16 ELEMENTS HAVE BEEN ADDED SINCE 1923. WHEN WILL IT END?

WARNING:
Chemical Periodicity is a theory. The theory keeps changing.
The theory is under dispute.
Teach alternative theories to children! (SEE BELOW)
